Recent Trends and Challenges in Recording Interviews: iIRG in Conversation with Davidhorn

tinyurl.com/iirg-con

Dr. Ivar A. Fahsing

Ret. Detective Chief Superintendent, Associate Professor at the Norwegian Police University College & Visiting Professor at the Norwegian Centre for Human Rights, Faculty of Law, University of Oslo. With over 15 years of operational experience as a senior detective in the Oslo Police Department and the NCIS of Norway, he brings a rare and authoritative perspective to the study and practice of policing and criminal investigations. Dr. Fahsing is also a member of the UNODC and INTERPOL expert group on the use of AI and neural networks in law enforcement.

Dr. R. Dian Dia-an Muniroh

Associate Professor in the Linguistics Study Program at Universitas Pendidikan Indonesia (Indonesia University of Education). She earned her PhD in Forensic Linguistics from RMIT University, Australia, in 2019. Since then, she has actively promoted forensic linguistics and delivered investigative interviewing training for academics and professionals across Southeast Asia. She is a member of the EU (COST) Action CA22128, ImpleMéndez.

Stig Knutsen

Chief Sales Officer (CSO), Davidhorn | Level 3 Investigative Interviewer. Stig has experience supporting police in delivering secure, compliant, and efficient interview recording solutions. He combines knowledge of evidence-based interviewing with expertise in technology deployment. As a long-time contributor to iIRG and member of the ImpleMéndez network, Stig actively promotes ethical and effective interviewing practices through collaboration between practitioners, researchers, and technology providers.

Abstract

We know that recording is essential for building and preserving reliable evidence through investigative interviewing. *So why is it still the case that so many police interviews go unrecorded?* This webinar brings together diverse lived experiences and professional insights on the evolving landscape of investigative interviewing and the use of recording technologies.

Dr. R. Dian Dia-an Muniroh shares findings from a Delphi study on the legal viability of Cognitive Interviewing (CI) in Indonesia, highlighting both the support for electronic recording and the legal gaps that hinder its implementation. Her research underscores the importance of legislative frameworks in enabling ethical and effective interviewing practices.

Dr. Ivar A. Fahsing draws on over 15 years of operational experience in Norwegian policing to reflect on the practical and institutional challenges of integrating recording into investigative routines. His perspective bridges the gap between academic research and field application, offering a critical view on how recording can enhance transparency and accountability in criminal investigations.

Stig Knutsen, Chief Sales Officer at Davidhorn and a level 3 Investigative Interviewer, contributes a technological and strategic lens to the conversation. With extensive experience in developing and deploying recording systems across jurisdictions, he discusses the role of innovation, standardisation, and cross-sector collaboration in supporting ethical interviewing practices.

Together, the speakers explore how recording interviews—when supported by legal, operational, and technological frameworks—can strengthen justice delivery, reduce coercion, and promote human rights in investigative settings.
