INTERVIEWS IN CRIMINAL PROSECUTION: THE PRACTICAL POTENTIAL OF THE MÉNDEZ PRINCIPLES

The 10th Symposium on Police Law will focus on the interviewing of persons by the police and the public prosecutor's office. In many cases, interviews are where the decisive evidence is gathered. They are one of the core tasks of prosecution. The way in which interviews are conducted has a significant impact on the outcome, fairness and reliability of any proceedings that follow.

The purpose of interviews is to obtain the most reliable information possible. Interviews are to be carried out so as to facilitate the solving of criminal offences. In doing so, the dignity of all persons involved (accused, victims and witnesses) must be respected.

At the symposium, experiences in implementing the Méndez Principles in interview practice will be shared. The implementation of the applicable requirements under police law, criminal procedure law and human rights law regarding interviews in Switzerland will also be discussed.

In the morning, experts from Switzerland and abroad will introduce the topic with presentations from a variety of different perspectives. In the afternoon, there will be parallel workshops at which specific topics can be discussed in depth. The event will conclude with a panel discussion with representatives from the police, the public prosecutor's office and academia.

The symposium will be held in three languages (German, French, English). Simultaneous interpreting will be provided for the lectures and the panel discussion.
